POSHAN COVID-19 MONITORING

Tracking information from surveys, rapid assessments and information systems to reinforce the nutrition response during the COVID-19 crisis

Monitoring Introduction

The POSHANCOVID-19 Monitoring page consolidates relevant data to monitor the interactions between COVID-19 and nutrition across the most populous states affected by both the pandemic and overall malnutrition.

The monitoring report sources information from surveys, rapid assessments, academic journals, health management and child development information systems, state and district level reports and is updated monthly. The report features state developments, the status of continuity of key maternal health and child nutrition-related services and presents the work of various development partners working in the area of food and nutrition security. The report is compiled by UNICEF, IIT-Bombay, IFPRI, World Food Programme and the World Bank.

The state policy matrices give an overview of the rapid evolution of policy actions since the recognition of the COVID-19 pandemic and the subsequent lock-down from 25th March to 31st May 2020. The matrices are a work by IFPRI/POSHAN and draw from government circulars and guidelines. State-level government circulars or decrees are collected into an online database. These decrees are analysed by their contents to determine the status of the delivery of interventions across the life cycle and included in the POSHAN Abhiyaan interventions.

We understand that when data is collected from multiple sources, there is a possibility that the information/data could be incorrect or incomplete. The data presented are not comprehensive. Efforts will be made to fill the data gaps existing in states and UTs and to update on a regular basis. By working together, we can compile robust information on Poshan & COVID-19 to assure the most appropriate response for India.

Please send us your feedback or report any broken/inappropriate links **here**

2021/08/30	Assessment	School Meals in India – Tracking State Government Response to COVID-19, April-June 2021	Summary of response at the National level during the period April-June 2021 The Ministry of Education, Government of India has issued various guidance documents to States/UTs on how to continue the nutritional support to school children during the pandemic. On June 15, 2021, as a complement to the provision of free food grains provided under the Government's Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY) COVID response scheme, the Ministry of Education decided to provide monetary assistance through Direct Benefit Transfer (DBT) for Cooking cost, to all eligible children as per MDM norms, for the summer vacation period (May-June) as a one-time special welfare measure. It may be noted that most schools are closed during this reporting period.

Date	Updates from state
Sep-2021	Based on successful advocacy by UNICEF scale up ECD programme through DWCD initiated in Aurangabad Division covering 8 districts and 2 ADs of Gadchiroli and Nandurbar. UNICEF partner MGIMS Sewagram has completed first phase training of 90 Master trainers as planned.
Sep-2021	Based on Nandurbar strategy for screening of children with SAM, screening drive for identification of children with SAM was implemented across the state as per guidance from ICDS Commissionerate and more than 18,500 children under 5 years have been identified with SAM as per the last report upto 15th Sept 2021. Identified children have been enrolled for appropriate care and management under VCDC or NRC.
Sep-2021	Multiple Nutrition activities for MAA, AMB, Screening for SAM, nutri-gardens etc. implemented across the state through ICDS, Health, Agriculture departments as part of POSHAN Maah celebration. As per the current reports on POSHAN Abhiyaan dashboard, state ranks first in number of activities conducted and also in participation.

State Policy Analysis

Drawing from Government circulars and guidelines, work by IFPRI/POSHAN presented in the policy matrices below gives an overview of the rapid evolution of po actions over the past three months since the recognition of the COVID-19 pandemic and the subsequent lock-down from 25th March to 31st May 2020. State l government circulars or decrees are collected into an online database. These decrees are analyzed by their contents to determine the status of the delivery interventions across the life cycle and included in the POSHAN Abhiyaan interventions. The results extracted are coded as intervention is fully operational, Intervent partly functional for selected beneficiaries or areas, Intervention is not operational and No information.

The data presented are not comprehensive. Efforts will be made to fill the data gaps existing in states and UTs and to update on a regular basis.

Key	Indication
Yes	Intervention fully operational for all beneficiaries through mobilization or outreach
Partly	Intervention provided at health facilities without mobilization or outreach; or partly functional for selected beneficiaries or areas
No	Intervention not operational
NI	No information
